

Engineering All Hands

Henrik von der Lippe
July 7, 2017

Our address:

- B50 Auditorium,
(Seaborg Road)
- LBNL
One Cyclotron Road,
Berkeley, CA 94720

Our evacuation/assembly
point:

- H1 Parking lot

Thanks to Deborah Wendt
for the idea

The nearest AED:

- Around the corner
to the left as you
exit the auditorium

Volunteers:

- Who is CPR certified and
willing to perform?
- Who will call 911?
- Who will lead the evacuation?
- Who will meet the emergency
vehicles?
- Who will sweep the room?

Scalable Control on Multidimensional Coherent Combining for High Average Power Ultrafast Laser

Explore engineering aspects of beam combining diagnostics and controls methods. Study and implement optimized multi-input multi-output (MIMO) control for each dimensional local control, including calibration and feedback control of cavity phasing and modulations in temporal stacking, stabilization of parallel channel phasing errors in spatial combining, and spectral optimization with understanding of phase dispersion and nonlinear effects in spectral combining. Apply system engineering and integration between multi-layers of controls for robustness.

FY17 budget was passed by Congress and signed by the President in April

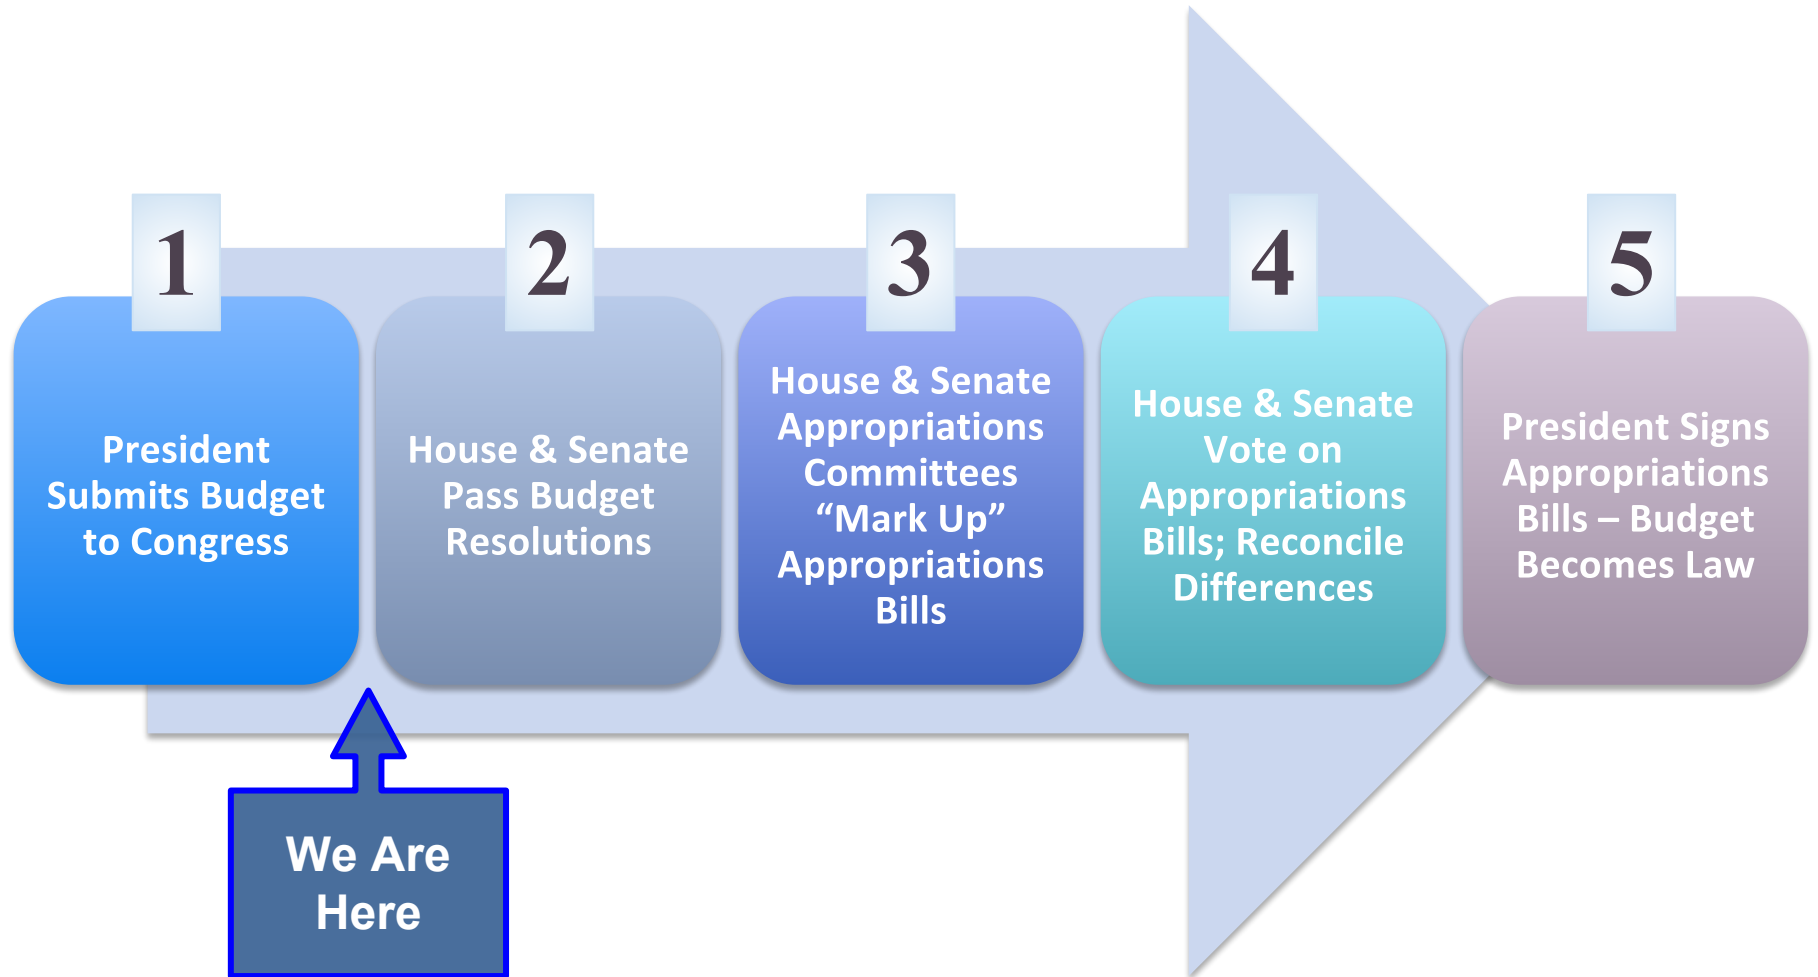

LBNL:

- **FY17: \$574M**
- **DESI and LZ each receive an additional \$2M in FY17**
- **ALS-U receive \$5M**

FY18 President's Budget Request for The Office of Science proposal -18%

- **Wait for Congress to complete their proposals**

Key Resources

(comprehensive resource list at the end of this checklist)

- ❑ [Berkeley Lab Training \(BLT\)](#) - Training requirements and profiles.
- ❑ [CAD](#) - CAD and computer documentation/resources (i.e., U/X drive, DCC, printing, and Windchill).
- ❑ [Division Contacts](#) - Identifies key functional roles in the division.
- ❑ [Engineering Division Website](#) - Overview of our capabilities and resources.
- ❑ [Engineering Process Guide](#) - Resource to guide employees.
- ❑ [IT Help](#) - Submit an online IT help request.
- ❑ [LETS](#) - Enter/approve timesheets.
- ❑ [Network Drives \(U-Drive and X-Drive\)](#) - Network Drives should be used for all data storage; especially project data that needs to be shared and backed up. Everyone has access to the X drive. Individual user (U drives) are created by IT upon request.

Actions (Required)

- Discuss [WPC \(Work Planning & Control\)](#) Activities with supervisor and activity lead; you are required to be assigned to at least one WPC Activity. Discuss the activity/activities that you are assigned to, associated hazards, and controls with your supervisor. ([WPC Training](#))
- [Read and accept WPC conditions](#) - For each WPC Activity that you are assigned to, you will be required to read and accept the conditions.
- Complete training identified through WPC.
- [Update Online Directory](#) - New employees may inherit their supervisor's contact information. Update the Lab directory with your office location and phone number/s as appropriate.
- [Login to Gmail](#) - Logging into Gmail will provide you with access to the Google suite of applications. Though the use of Gmail and Gcal are required for all employees, other applications are available/required for various productivity functions.
- [Login](#) to Smartsheet - SmartSheet is a tool used for managing tasks, small projects, or labor resources. Login with your Lab Gmail to activate your Smartsheet account.

Using Laptops in Non-Office Environments

January through May 2017 Data:

- 3% signature reports missing

Great improvement!
Please continue.

Lets Time Reporting

Engineering Division Time & Effort Reporting has been

- Most post-sweep resource adjustments
- 75% of requested signature reports missing
- We are not meeting the DOE requirements

Proposed process Improvements

- Release LETS time 1 day before sweep
 - *Work with supervisor and work lead to enter correct activity numbers*
- Supervisor to quality assure correct account/activity
- Time not entered, released and/or approved by the timekeeper documented on paper
 - LETS system emails PDFs for documenting correct time entry/approval
 - Work with LETS timekeeper to get correct time
 - Employees & Supervisors: **Return Signature to timekeeper within 1 week following the sweep**

- 33 obsolete or malfunctioning computers
- 13 rolling bins and 3/4 of a dumpster of paper and cardboard
- 28 hoppers, rolling bins, barrels, and pallets of excess equipment and miscellaneous scrap and salvage
- 1 cargo container filled with still-needed items that were not in active use
- 0 accidents and injuries — the best statistic of all, thanks to appropriate PPE and staying within our training and abilities
